this is another situation whereby glidden / [REDACTED] playing games..
3 weeks after vendor visit they realize they need stainless mufflers i will agree but not fair and tired of watching glidden /
[REDACTED] allow every vendor to take advantage of you..

Mike's tech arrived on 8-27 and departed on 8-28. All in the barge log I am told.

Just got this from Mike Metcalf.

Steel units are standard for waterless exhausts, I was told, but our barge is more wet on the exterior than would have been expected.

Mike is expecting your call.

MG.

Hello Michael,

It was brought to my attention from my guy who visited the vessel that there is quite a bit of moisture in the engine room and he's concerned that the steel mufflers that were quoted wouldn't be sufficient and felt that we needed to upgrade the mufflers to stainless. This can be done but there would be an additional cost of \$1,246.76 per muffler. If this upgrade is ok please let me know and it will be added to the order if not then we will proceed with the mufflers quoted but if the engine room keeps getting water in it, unfortunately the mufflers will likely prematurely fail. Please get back to me ASAP.
